Data Interpretation

- We are able to categorize the terms used to describe Moll and her crossdressing
- With these categories, we are able to discern whether or not various describing words were previously in use or were newly-created to encompass the cross-dressing
- We can learn where certain terms are used within the play, and if they are used in close proximity to other terms
- We can characterize the speech of certain characters based on the words they used to describe Moll

Future Research

- How can we compare Moll's language when she is dressed as a man versus as a woman? In other words, does Moll always speak the same way, or does her gender presentation affect her speech?
- How can we compare Moll to other female crossdressers in early modern drama?
- Do other female cross-dressers experience these kinds of descriptors as well?
- Do visual representations of cross-dressing match these language descriptions?
